Pediatric Radiology and Global Surgery

- Introduction to Pediatric Imaging (Basics and Cases)
- Plastic Reconstructive Surgery & Global Surgery
- Pediatric Emergency Medicine (PEM) & Case Based Discussions
- Functional Neurosurgery

Jeopardy Game !

" To learn is one thing, but to be able to engage in deep meaningful conversations with the most accomplished physicians about their personal experiences and global initiatives truly opened my eyes to what our profession is really about. I'm eternally grateful for this opportunity and to the faculty at CHOP for their continuous support and guidance through this entire experience."

4th Year Medical Student
Fatma M Alhashimi
