Supervisor: Intisar Alhasani

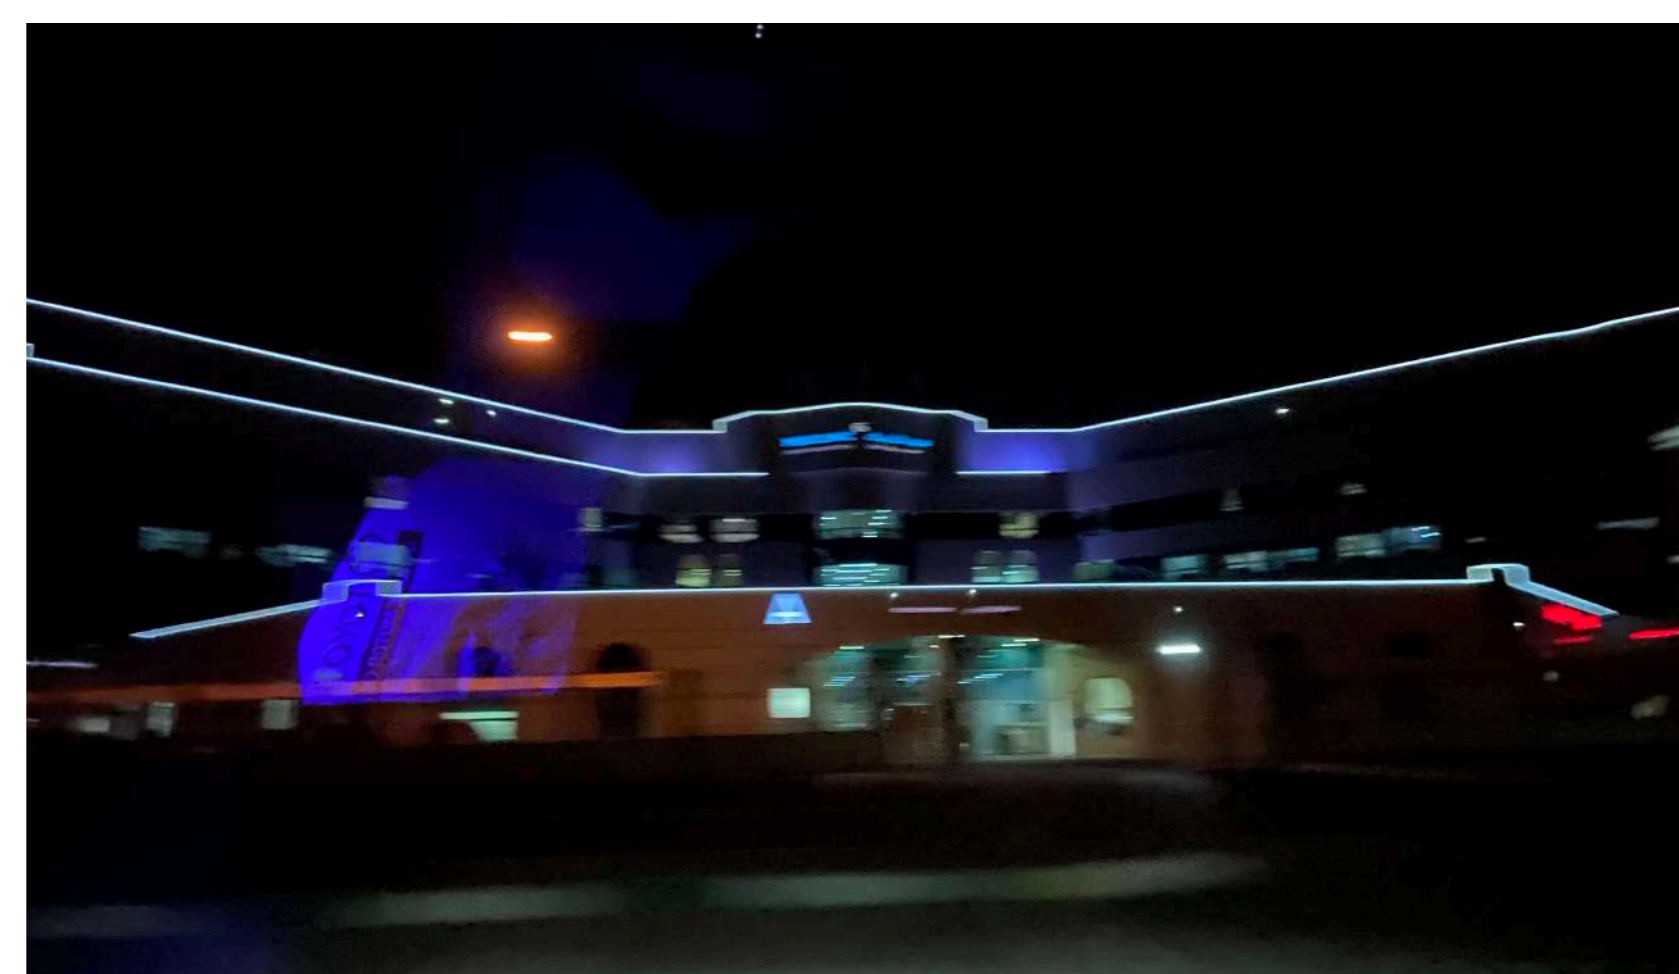

Saif

I went to the cardiology, emergency and pediatrics departments, it was both interesting and informative, and it allowed me to apply what I learned in the courses I had especially the body system courses. Overall, this gave me a chance to decide what doctor I would like to be in the future.

Sana

During my time on this placement, I got to rotate in the pediatrics and neonatology departments. I enjoyed learning from the different doctors there. In general pediatrics, I saw children of different ages coming for all sorts of reasons including covid, salmonella, influenza, vaccinations, and new born check ups. In the neonatology department, I got to shadow my neonatologist and watch a few c-sections too and got to follow the nurses and learn from them in the NICU. Overall, it was an enjoyable experience and I learnt a lot.

Ameline

I got the opportunity to shadow the medical professionals in the emergency and OB/GYN wards.

I was able to develop my skills as a medical student by seeing the doctors and interns in the emergency room throughout their daily activities. This included learning more about history taking, physical examinations, how to fill in medical records, and much more. Moreover, I had the chance to assist a surgeon on a C-section, a botox injection for an overactive bladder, and a myomectomy in the OB/GYN department. Finally I am grateful for the MBRU Summer Scholar Program and Mediclinic Airport Road Hospital for further increasing my passion to pursue surgery.

Mahra

During my medical training, I had the opportunity to shadow both general surgery and ob-gyn doctors. I learned a lot from both experiences and had the privilege of meeting many skilled physicians. While shadowing ob-gyn doctors, I had the chance to observe many procedures such as Hysteroscopy, laparoscopy, and Endometrial ablation. I was even able to assist in a significant surgery like Hysterectomy. Overall, these experiences helped me develop a range of valuable skills, including effective communication, teamwork, critical thinking, and problem-solving.
